Communication

Time Management

Teamwork

Problem Solving

Microsoft Office

C++

Javascript

HTML & CSS

Adobe Photoshop

EDUCATION

BUCHAREST ACADEMY OF ECONOMIC STUDIES
Accounting and Management Information Systems
2018 - 2021

PERSONAL INFO

I knew after approximately a year and a half in audit that my job was not fulfilling enough for me. I am a highly creative person who enjoys working with colors and coming up with new ideas, so I began learning HTML, CSS, and JavaScript to design websites. From just a hobby, programming turned into a passion that I wish to pursue professionally.

EXPERIENCE

TPA Romania - Audit Associate

February 2022 - May 2022

KPMG Romania - Audit Associate

September 2021 - February 2022

Nestle Romania - Sales Controlling Trainee
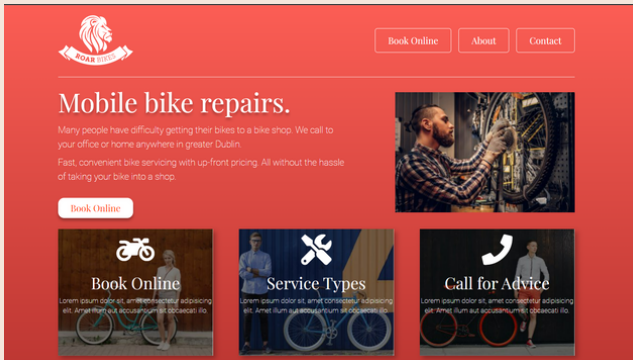

August 2019 - November 2019

Projects:

Adaré Restaurant Website

I made this page using HTML and CSS. This was my first project that I made following a course on Udemy.

Adare-Restaurant.github.io

Bike Repairs Website

This was part II of the course I followed on Udemy. It was also made using HTML and CSS

Bike-Repairs-Website

My own Website

I created my own website using HTML, CSS and JavaScript. I wanted to have my own platform where I could show future projects, links to other platforms and contact information. Right now, the website is hosted on GitHub.
https://aandreearaluca.github.io/

Travel To Go Website

This website was created using JavaScript, HTML and CSS. I made a "Travel To Go" website because I love travelling and I always keep lists with different places tahat I would like to visit. Also, I felt like there's enough to do lists online so I wanted to change it to travelling.
Travel-To-Go
